TRM China - Trade in Services

Corrigendum

Paragraph 22 of the Annex to the above document should read:

22. Some conditions imposed on foreign invested enterprises are imposed on the foreign partner of the joint venture (JV), please explain some of them: is it necessary for the principal foreign operator to have the "same type of basic telecommunications operations in the registration country or area" as the operations for which the JV is going to apply for a licence in China? What does «a good business record and operational experience in the basic telecommunications services» mean? Why are such conditions imposed in addition to the general provisions mentioned in article 11 of Order 291?
